

INSTALACJE 2006

Offers of top quality – New on the market – an overview – Satisfaction guaranteed

Heat, water, gas – exhibitions prepared by the exhibitors of INSTALACJE 2006 are targeted at specific audience. Both professional stakeholders, who dominate among the visitors, as well as end users of the equipment presented at the fair, who also visit the INSTALACJE trade fair, have an opportunity to see the latest offer of heat engineering and heat generation technology, ventilation and air conditioning, electrical and power installations, water and sewage technology and gas technology.

This year products represented these fields will be presented by over 400 exhibitors from 22 countries. The fair, which is open to visitors in Poznań from 28 to 31 March 2006, can be visited from 9.00am to 5.00pm.

Trade fair of new products

INSTALACJE stands for the presentation of the latest offer of the exhibitors, who come to Poznań every two years. Every visitor has an opportunity to examine and compare the offers. Furthermore, thanks to the special New Product Island exhibition, stakeholders can quickly identify the best products.

Trade fair of knowledge

Modern trade fair entails events carefully prepared and targeted at clearly defined audience. The Installation Technology Forum, with conferences and discussion held every day during the fair, features a general session and four theme sessions: heating, ventilation and air conditioning, water and sewage systems and an intelligent building. The programme also includes meetings on network heating engineering and pump installations.

An interactive trade fair

BudShow, an active “live” demonstration of materials, equipment and technologies, has been organized with individual investors in mind. This year it focuses on energy efficiency. This year BudShow, an event already known to BUDMA trade fair participants, this year includes installation companies and is held during the INSTALACJE trade fair.

INSTALACJE 2006 – exhibitions

HEAT

heat engineering and heat generation technology	Pavilions 3, 3A
ventilation and air conditioning technology	Pavilion 6
electrical and power installations	Pavilion 6

WATER

water and sewage technology	Pavilions 6A, 6B
-----------------------------	------------------

GAS

gas technology	Pavilion 3A
----------------	-------------

Services, execution and expert advice	Pavilion 3
---------------------------------------	------------

BudShow – “An energy-efficient house”	Pavilion 4
---------------------------------------	------------

INSTALACJE 2006 – programme

Installation Technology Forum at INSTALACJE 2006

- New challenges, technologies, requirements
- Cooperation between architects and designers

Organizers:

- The „Rynek Instalacyjny” monthly
- Poznań International Fair

Sponsors:

- Polish Chamber of Construction Engineers
- Polish Union of Sanitary Engineers and Technicians
- Association of Polish Electricians
- Polish Chimney Sweepers' Corporation
- Oil and Gas Institute

Venue and time:

- 28 March, 10.00am-3.00pm	
Opening and general session	Pavilion 3 – Green Room
HEATING	Pavilion 3 – Green Room
VENTILATION AND AIR CONDITIONING	Pavilion 3 – Blue Room
WATER AND SEWAGE	Pavilion 5 – WTC
INTELLIGENT BUILDING + SECUREX	Pavilion 14B – Room A

Modern network heat engineering

Organizer:

- POLISH HEAT ENGINEERING Chamber

Venue and time:

- 29 March, 1.00pm-4.30pm	Pavilion 3A – Conference Room
- 30 March, 10.00am-1.00pm	Pavilion 3A – Conference Room

Energy efficient pump installations

Organizer:

- Association of Pump Manufacturers

Venue and time:

- 30 March, 12.00pm	Pavilion 3 – Blue Room
---------------------	------------------------
