24 a 26 de Maio de 2017
Mogi Guaçu, Brasil

The largest forest fair in Latin America

The Expoforest – Brazilian Forest Fair is a dynamic and static forestry fair focused on machines, equipment, consumables, transportation, biomass and technology used in wood production from planted forests. Is an excellent place to make business, after all it brings together forest professionals from all over Latin America.

One of the main features of Expoforest is that happens inside a Eucalyptus plantation. This way, visitors can watch “in loco” operations happening according to real operation practices.

With 200 exhibitors and more than 10,000 visitors, Expoforest 2014 did another step to became the largest forestry dynamic fair in America.

EUROFOREST 2018

the forest-wood exhibition in France

19-21 June 2014
Burgundy, France

The best of men, techniques and equipment

Within 20 years, Euroforest became the major forest and forestry show in France. It reflects the richness and the diversity of the French forest and shows the vitality of the forest and wood professionals. All the professionals are gathered around Euroforest since this show was initiated by and for them.

Euroforest takes place in a natural environment; it is surrounded with coniferous and deciduous trees and it presents flat and sloping grounds. Euroforest is the place to be to see forestry materials used in real conditions. These demonstrations will show the latest innovations on running equipment to the visitors. It is really the best opportunity for professionals to compare equipment and make the best choice!

Euroforest is also a tremendous asset to promote the forestry activities among the public. It is the only forestry show forging closer links between the public and the professionals.

Some figures:

- > A 150 ha forest site
- > A 4 km (3 miles) long tour
- > 300 exhibitors
- > 35 000 visitors in 3 days
